## Real Time Gross Settlement

NiMble has acquired in depth skills in successfully implementing RTGS for Central Banks. We assist our clients with RTGS logic, design, specification and implementation. We also provide support after “Go Live” for the system to mature and be productive for the objectives set by the client.

At NiMble our approach to RTGS implementation starts from collaborative identification of the different users requirement which is then mapped to the client’s needs and business logic. This is then converted into the system architecture and an RFP is developed to get an appropriate vendor. At the same time technical infrastructure architecture is also designed and RFP created for identifying appropriate vendor. NiMble will also assist in the evaluation of the bidding documents and if required by the client will Project Manage the implementation on behalf of the client.

NiMble believes in ensuring best practices use and compliance with international standards and use of the best technology. We make sure the client gets the best output from our integrated services.

## Merger and Acquisition

Many companies look towards mergers and acquisition to ensure growth or sustain growth. This means that in order to ensure the merger or acquisition takes place, a series of tasks have to be under taken to ensure flawless and comprehensive deal. We at nimble specialize in providing very crucial services which will assist our clients to focus on the business aspects of the deal and depend on us to provide them will all the data and information which have been verified and is converted into knowledge for application in key decision making.
